

Flow Reception Counter

The Flow Reception Counter is a modular three piece station designed to make a professional impact in large corporate lobbies. It features a curved tempered glass visitor hob and a reversible return that adapts to various room layouts. This substantial unit is constructed from environmentally friendly melamine and includes a silver kick plate for enhanced durability in high traffic areas.

FEATURES

Reversible return allows for assembly on either the left or right side.

Curved tempered glass visitor hob provides a dedicated space for guest transactions.

Full height front unit ensures a private and secure workspace for staff.

Silver kick plate protects the base of the counter from scuffs and impact.

Three piece modular construction facilitates easier setup and structural integrity.

Finished in a traditional Beech melamine with a silver kick plate.

Constructed from environmentally friendly EO rated melamine board.

Features a curved tempered glass hob top for the corner unit.

Clean professional lines suitable for large scale corporate reception areas.
