with **Hushoffice** acoustic pods.

The world of work is evolving. Modern, flexible workplace concepts combine hybrid collaboration models, supportive office design, and advanced acoustic solutions that boost productivity and support employee well-being. When designing today's office spaces, we need to balance open areas that encourage teamwork, creativity, and social interaction with spaces that meet employees' individual needs for quiet, focused work.

Hushoffice acoustic pods are designed to create comfortable, inclusive spaces for both teams and individual employees. Each pod is thoughtfully crafted to seamlessly fit into any workspace while meeting the unique needs of its users. Combining style and function, the pods feature new acoustic panels available in eight timeless colours. Their flexible configurations allow each pod to be customized to users specific preferences and the customised demands of today's workplaces.

Discover the **hushFree** acoustic pods from **Hushoffice**

The most advanced line of premium acoustic pods, offering eight diverse models that enable efficient use of any space and flexible interior arrangements for any organisation. Advanced acoustic solutions provide even better support for focused work, collaboration, and team meetings.

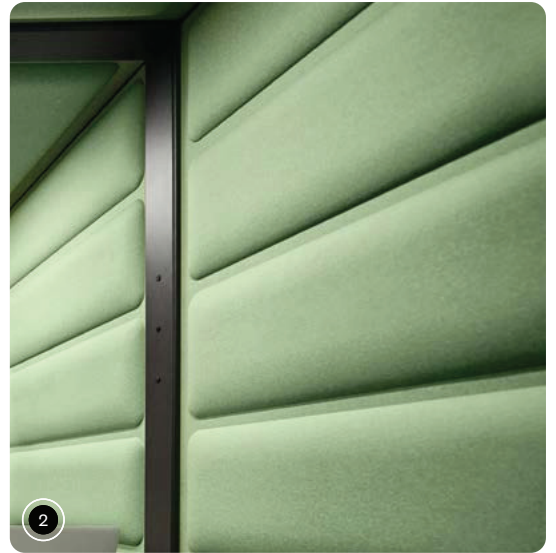

ACOUSTICS

Acoustic Class

A

CERTIFICATION

Freely configurable interior - from an empty pod to one that is fully furnished with Hushoffice furniture and accessories

Modern, aesthetically designed thermoformable acoustic panels

Improved lighting with adjustable intensity and colour temperature

Highly efficient ventilation system enhances cabin comfort

Advanced hushAssistant module for pod control (optional)

Optional hushBooking reservation system

Ready for sprinkler system connection as standard

Door handle designed to assist people with reduced mobility

Floorless versions available, designed for accessibility and inclusivity.

Full pod mobility included as standard for models with flooring

hush Assistant

At the heart of the user-centred design behind the hushFree acoustic pods' line is the new hushAssistant control module.

With its simple, intuitive touchscreen, users can easily adjust light colour and intensity, control airflow, or reserve a pod with just a few swipes and taps.

All settings can be tailored to the user's individual needs or quickly set using one of five preconfigured modes: Default, Auto, Focus, Relax, and Video Call (available in one-person pods).
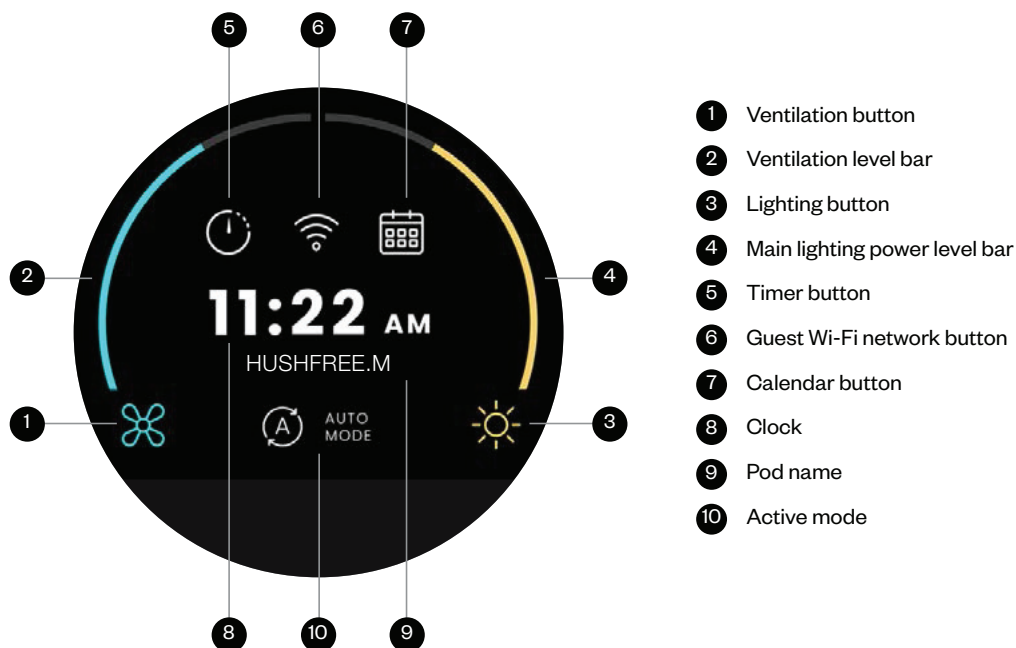

The reservation system allows for quick, ad-hoc bookings directly from the pod for impromptu meetings, as well as scheduled reservations through devices running on the Microsoft 365 Business platform.

Helpful reminders prompt users to take coffee breaks and rest, promoting optimal productivity throughout the day.

A dedicated Demo mode guides users through the hushAssistant's features, making it easy to explore all its capabilities.
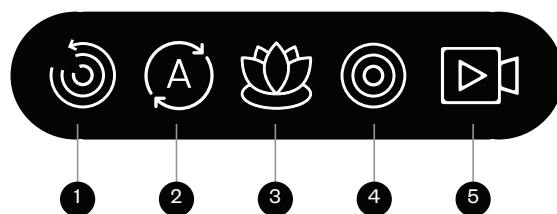

With hushAssistant, Hushoffice pods deliver not only acoustic comfort and privacy, but also meaningful support for employee performance and well-being.

Feel **free** to adapt your space

1. Ventilation button
2. Ventilation level bar
3. Lighting button
4. Main lighting power level bar
5. Timer button
6. Guest Wi-Fi network button
7. Calendar button
8. Clock
9. Pod name
10. Active mode

Mode selection

1 Default mode

2 Automatic mode

3 Relax mode

4 4 Focus mode

5 Video Call mode (optional)

Each mode comes with preset lighting and ventilation settings:

	Ventilation	Main lighting power	Main lighting colour	Side lighting
DEFAULT	100%	User settings	User settings	0%
AUTO	100%	50% - 100%	2700K - 6500K	0%
RELAX	100%	70%	2800K	0%
FOCUS	100%	90%	6500K	0%
VIDEO CALL	100%	60%	4000K	100%

In Default mode, the main lighting power and colour are set according to the user's selected preferences. In Auto mode, the lighting is automatically adjusted based on the human circadian rhythm. This mode aligns the colour temperature and light intensity with the time of day (according to a person's circadian rhythm, i.e. an internal body clock), reflecting natural lighting patterns to create a more comfortable environment and foster a stronger connection to the outside world.

hushfree.XS

The hushFree.XS acoustic pod is designed to take up minimal space while providing full acoustic comfort and privacy for phone calls and short video meetings. It is the perfect solution for offices with limited space and for teams needing a quiet environment for conversations. The pod is equipped with a comfortable desk and additional LED lighting to improve face visibility during online interactions. Standard equipment includes the hushAssistant module, a 4-inch round light, and a ventilation controller with a high-resolution touchscreen.

hushfree.M

The hushFree.M is a versatile acoustic pod that accommodates up to 4 people and supports teamwork, confidential meetings and conversations, or creative brainstorming. It can also be used by individuals in cases where one-person pods are unavailable. With removable furniture, the pod can be easily personalized by selecting the colour and configuration of the table and sofas, along with optional features like the hushAssistant module and booking system. Integrated features such as the castors allow for easy movement and flexible reconfiguration within the workplace.

OFC

hushfree.L

The hushFree.L acoustic pod is an excellent alternative to medium-sized conference rooms, providing complete flexibility and other benefits of acoustic pods. It has been designed for meetings of up to 6 people, teamwork, business presentations, or workshops. The furniture layout can be customised to suit the needs of your office, space, or team — either by integrating your own furniture or by selecting from our pre-defined conference or coffee table and sofa options. The pod can also be equipped with a TV or screen mount to support teamwork and hybrid meetings. With the hushBooking option or the hushAssistant module, you can ensure the pod is available whenever your employees need it. The hushFree.L acoustic pod has integrated castors, making moving and rearranging your workplace easy.

hushfree.Access.M ♿

The hushFree.Access.M acoustic pod is fully adapted to the needs of people with mobility disabilities. It features a low threshold for easy wheelchair access, a wider door, and a convenient handle for smooth opening. The pod comfortably accommodates up to four users for meetings or serves as a quiet, private workspace that provides full acoustic comfort for individuals using wheelchairs. Its interior is highly flexible, easily adapting to different user needs and configurations — from a collaborative meeting space to a private focus room. Alternatively, you can choose from our predefined setup with a table and two two-seater sofas.
